

Dear readers,

product innovations, special offers, product launches – in the current issue of our newsletter you will find especially interesting news about the software solutions we distribute.

As far as COVID-19 is concerned, we also enjoy the various relaxations and the return of more normalcy in everyday working life. However, certain preventive measures such as the distance regulations (which we explicitly endorse) or travel restrictions continue to apply. As a modest contribution, DAASI International offers interested organisations its support in digitisation, e.g. in the form of our special offer for NGOs, which enables them to continue to personally contact customers and stakeholders through free video conference servers.

I hope you enjoy reading this newsletter.

Kind regards,

*Jennifer Vosseler*

Head of Marketing at DAASI International

## Events

**HOME OF IT SECURITY**

Nürnberg, Germany  
6.-8. Oktober 2020

### Update: DAASI International will not be attending it-sa 2020

After careful consideration, DAASI International has decided against attending at this year's it-sa in Nuremberg.

Registration deadlines, uncertainty about the approach to major events in the forthcoming months and the potential risks for our on-site employees have prompted us to make this decision. If you were planning to meet DAASI International at this year's it-sa to find out more about IAM and/or our solutions, you can of course also do so through our usual channels (see footer). We are looking forward to your messages!

## Did you know?

July 6th was the annual "Take Your Webmaster to Lunch Day". This day is supposed to create awareness for the hard work of every webmaster everyday and is supposed to be a reminder for people to say "thank you".

---

## You miss being addressed personally?

DAASI International attaches great importance to the protection of your data. In our opinion this already begins with the principle of **data minimisation**. Therefore we deliberately refrain from asking for names or other personal data in the registration form for this newsletter. The only exception to this is your email address which is necessary in order for you to receive the newsletter. So please do not be surprised if we do not address you personally with your name at the beginning of the newsletter.
