Dear readers,

Gaia-X is a vision of a cloud infrastructure in accordance with European principles, which is slowly taking shape. In this edition of our newsletter you can read about how we together with the company Vereign plan on contributing to this great project.

Our partners also have quite some news – in regards to strategy, technology, and their teams.

Finally, I would like to draw your attention to *Job Aid for Ukrainian Refugees*, which supports refugees in their search for a new job. Even if you do not have a job to offer yourself, we would appreciate if you could share the website in your channels.

Thank you and enjoy the read.

Jennifer Vosseler
Head of Marketing at DAASI International

News

New Technologies for Gaia-X

Together with the Swiss company Vereign, DAASI International announced the start of development for the Gaia-X federation services. The goal of the project is to set the cornerstones for SSI technology in the form of a personal credential manager, an organisational credential manager, as well as the according trust services. For this purpose, the developers will be working on open source software, which will eventually be further developed and improved on by the community. You can read about in more detail in the press release.

Job Aid for Ukrainian Refugees – Please Share!

The website **www.jobaidukraine.com** allows companies to offer jobs specifically to people fleeing Ukraine. DAASI International decided to post job offers too:

- IT System Engineer
- Junior SSO Consultant
- Intern Position

If you currently have any job openings, please consider to additionally use the platform.

Add Job

Did you know?

The term "open source" was coined for the first time in 1998 during a strategy meeting in Palo Alto. It was in reaction to the publication of the source code of the Netscape "Communicator" source code. It was merely a week later that Linux founder Linus Torvalds endorsed the term as well as the defintion as publicly accessible code had been widely adopted.

You miss being addressed personally?

DAASI International attaches great importance to the protection of your data. In our opinion this already begins with the principle of **data minimisation.** Therefore we deliberately refrain from asking for names or other personal data in the registration form for this newsletter. This only exception to this is your email address which is necessary in order for you to receive the newsletter. So please do not be surprised if we do not address you personally with your name at the beginning of the newsletter.
